Profile

Computer Science Student at PES University | Passionate about Software Development and AI | Seeking Internship Opportunities

PROJECTS

AI PIPELINES WITH LANGCHAIN & RAG | PYTHON, LANGCHAIN, VECTOR STORES | 2025 - 2026

- Developed multiple AI applications covering LangChain fundamentals, prompt engineering, structured outputs, RAG pipelines, vector databases, retrievers, and conversational memory.
- Engineered document and YouTube RAG assistants with semantic search, source-grounded responses, hybrid tool-calling agents, email automation, and interactive Streamlit interfaces.

*****Currently developing a RAG Document Assistant for conversational PDF question answering and a YouTube RAG Chatbot for context-aware video-based Q&A using LangChain and vector embeddings.***

GAMEVERSE – FULL-STACK GAMING PLATFORM | React, Node.js, Express.js, MongoDB | 2025

- Built a full-stack MERN gaming platform featuring JWT authentication, REST APIs, user profiles, tournaments, leaderboards, and gameplay progress tracking.
- Designed scalable backend services with MongoDB and Express while developing a responsive React frontend following modern client-server architecture.

SYSTEMS PROGRAMMING PROJECTS | C, Linux, Operating Systems | 2025

- Developed a Git-inspired Version Control System implementing content-addressable object storage, file staging, commit history, and SHA-256-based object management.
- Built a lightweight Linux container runtime featuring process isolation, a supervisor daemon, kernel-space memory monitoring, and resource management concepts.

Education

B.TECH. in PES UNIVERSITY | June 2024-2028 | Electronic City, Bangalore, Karnataka, India

Skills & Abilities

Languages : C, Python, JavaScript, C++

Web Development : HTML, CSS, React.js, Node.js, MongoDB (MERN Stack)

AI / ML : LangChain, Retrieval-Augmented Generation (RAG), Vector Databases, Prompt Engineering

Core CS : Data Structures & Algorithms, Operating Systems, Computer Networks

Tools : Git, GitHub, Linux, VS Code

Networking : Software-Defined Networking (SDN), Mininet, POX Controller, OpenFlow Protocol

Activities and Interests

CTF Challenges, Cybersecurity, Machine Learning & AI, LangChain/RAG Experimentation, Hackathons,
